EDUCATION

Korea Advanced Institute of Science & Technology (KAIST), School of Computing
M.S. Student Sep. 2026 – Present

Korea Advanced Institute of Science & Technology (KAIST), School of Computing
B.S. | GPA: 3.8 / 4.3 Mar. 2021 – Feb. 2026

RESEARCH INTERESTS

- **Video understanding & reasoning:** Agent systems for long-form and egocentric videos, including efficient video inference on edge devices.
- **Prompt & agent optimization:** Methods that improve the computational and data efficiency of prompt and agent optimization.
- **VLM post-training:** Post-training methods that improve multimodal understanding and reasoning in vision-language models.

EXPERIENCE

MLV Lab, KAIST Daejeon, Korea
Intern Jun. 2025 – Present

- Conduct research in multimodal AI and vision-language models, advised by Prof. Hyunwoo J. Kim.

Smoretalk Korea
AI Engineer Dec. 2024 – Aug. 2025

- Participated in AI service development using image generation and editing technologies.

Naviworks, DX Technology Team Korea
Internship, AI Engineer Feb. 2024 – Aug. 2024

- Participated in the metaieyes digital twin platform project, developing product features for converting 2D data into 3D data.

PATENT

[P1] Apparatus and method for generating standard objects based on satellite imagery. Korean Patent Application No. 10-2024-0117862, filed Aug. 30, 2024; Publication No. 10-2026-0031996, published Mar. 9, 2026.

SKILLS

Research AI agents, video understanding, multimodal AI, vision-language models, retrieval and reasoning.

Engineering Python, PyTorch, Git, model training and evaluation, AI service prototyping.
